Foreman: *Please refer to the Level 1 Line Worker Craft Classification Work Function List for training or modifications.*

Essential Job Duties:

1. Participate in pre-shift planning meeting, problem solving groups and safety meetings.
2. Review Material Acquisitions for accuracy: Supervisor will assign worker to a line crew that is doing smaller one-day jobs. In the morning, take a look at left over parts from previous day's job; make a list. Look up the stock numbers for the left over items and make a list for the Supervisor. When crew returns, review the material list for that day's job with foreman to see if all the needed materials were there. Make a list of the missing items also, with stock numbers, and turn completed lists into Supervisor the next day. Worker may review left over items for multiple crews' small jobs. Worker stays at the yard at this level.
3. Get handwritten Close Call Reports from foreman and enter information into company data base. Review Close Calls Reports on computer. Identify and complete work order for corrective action and/or follow up with assigned worker to document corrective action they have recommended.
4. Review and update the Resident Service Handbook that governs responsibilities to customers. Interview employees, via emails and telephone, about what changes should be made and create a draft document in Word. This will require multiple administrative reviews for completion.
5. Review the daily data sheets for power quality; analyze performance to determine if it is falling beneath standards and make recommendations to supervisor for equipment modification or repair to correct performance deficiencies.
6. Gather information from appropriate parties to determine priorities for scheduling work and convey this information to the supervising foreman.
7. Assess materials and equipment (if accessible within injury limitations) to determine there are sufficient resources available to complete upcoming work orders. Document what is needed and who is responsible for ordering the materials and gain approval from engineer or foreman as appropriate. Create requisitions for materials, as allowed, and forward to purchasing department. Track estimated time of arrival for materials and report to foreman to schedule job. May require assistance to access parts above shoulder height.
8. Verify blueprints, PC and ID's (piping, cable and instrumentation diagrams) and schematics contain the latest revisions. Gather all redline drawings from crew members. Transfer redline corrections to as built drawings or work plans. Archive previous redline versions.
9. Audit the day's invoices for line expenditures to make sure they are accurate. This will require some Excel training if the worker is not familiar with the application, 2-4 hours per day.
10. Inventory all the computers and other electronic devices being used by the line department. Contact all line department employees by phone, radio or email and get the make model, and serial numbers of their devices and create a document in Word with the list.
11. **May perform regular job duties that are within the physical demands outlined in this job description.**

Potential Training Needed:

Worker will need basic skills in using a computer, creating documents in Word and using data entry application.

*Worker will need training in how to adjust the ergonomic chair and workstation to keep the keyboard at the ideal height and the chair at the right angle for comfort and to prevent pressure on the sciatic nerve and pressure on the low back.

Machinery, tools, equipment and personal protective equipment description:

Computer
Stock Number Book
Pens, Clipboard

Modification Equipment Recommended:

Sitting - Standing Workstation to sit or stand at will.*

Ergonomic Chair custom fit to the worker with lumbar support and waterfall front seat*
